

## PRESS RELEASE

### **Binfinity and Fusion Systems partner to provide low-latency execution and risk control for cryptocurrency trading**

Zug, Switzerland (September 4, 2019) - Fusion Systems Ltd., announced today that Binfinity AG., a global digital asset platform, is now live with Fusion's Raptor® product suite for low-latency exchange connectivity and pre-trade risk control. This partnership underscores Fusion's commitment to digital assets, and re-enforces the choice made by many of the world's leading investment banks to trust Raptor for their trading and risk management needs.

Raptor provides Binfinity's retail and institutional clients with comprehensive electronic execution capabilities, while meeting stringent and evolving regulatory and reporting obligations. Binfinity recognizes that resilient, secure and scalable technology is imperative to meet the continued growth and confidence of investors within the digital asset landscape.

Hitoshi Hasegawa, Chief Operating Officer at Binfinity, commented: "Selecting the right technology platform for our trading operations was a key strategic decision. Raptor is renowned for performance, and has an impeccable track record serving the world's most reputable financial institutions. Raptor allows us to launch with superior performance across many currency pairs, and will scale to meet our ambitious growth plans."

William Dallyn, Regional Sales Director of Fusion's Raptor division, added: "We are delighted to announce the successful go-live of the Raptor trading platform with Binfinity. Our continued strategy has been to develop the fastest and most resilient exchange gateway on the market; one that provides exceptional execution capabilities and multi-asset support, while complying with regulatory requirements that the industry demands today. The new partnership with Binfinity is further validation of that strategy."

#### **About Binfinity AG**

A new class of cryptocurrency exchange.

Binfinity is a customizable high-performance digital asset marketplace that serves the needs of both retail and institutional traders. At the core of the Binfinity platform is the ultra-low-latency matching engine which allows for all traditional trading orders, including market, stops, limits, and take profit. The client focused exchange platform provides a wide range of analytical tools and deep liquidity on over 20 altcoins.

Established in Zug, Switzerland, with a core commitment to meeting regulatory requirements, Binfinity complies with all applicable regulations and full transparency with authorities, users and listed asset owners. Binfinity's team consists of capital markets professionals committed to providing a secure, transparent and efficient trading experience from day one.
