Raptor Financial Technologies Expands India Presence Through Strategic Partnership with OmneNEST Technologies

Tokyo & Mumbai | 23 July 2025 — Raptor Financial Technologies (“Raptor”), a leading provider of low-latency market gateway and pre-trade risk management solutions, today announced a strategic partnership with OmneNEST Technologies (“OmneNEST”) to strengthen and expand its footprint in India’s rapidly evolving securities industry.

Raptor enables investment banks and proprietary trading firms to connect their low-latency, high-value order flows to stock exchanges across India and APAC, while ensuring full regulatory compliance. Trusted by top-tier global trading firms, Raptor consistently delivers nanosecond to microsecond-level performance and offers comprehensive pre-trade risk controls to meet stringent local regulatory standards and uphold market integrity.

OmneNEST is a leading provider of multi-asset trading technology in India’s securities industry. Through this partnership, OmneNEST, an exchange-empanelled vendor, will deliver Raptor’s market gateway and risk management solution to India brokers and trading desks as part of a unified, exchange-empanelled, and locally supported offering. Together, Raptor and OmneNEST offer trading firms a fully integrated experience, combining local accountability, simplified engagement, and access to proven technology tailored to India’s unique regulatory and operational trading environment.

With over 12 years of experience servicing high-volume order flows in India, Raptor supports all major exchanges, including NSE, BSE, MCX, NSE IX, and India INX, across cash equities, listed derivatives, and other asset classes.

William Dallyn, Global Sales Director at Raptor, said: “We are delighted to partner with OmneNEST and make Raptor even more accessible to trading firms in India. This collaboration brings our globally proven, low-latency solution together with trusted, local delivery. For India brokers and trading desks, that means faster onboarding, simplified operations, and a single point of contact while maintaining the highest standards of performance and compliance.”

Paresh Hede, Chief Executive Officer at OmneNEST, added: “Our clients are looking for speed, compliance and operational resilience they can rely on every trading day. Raptor has proven low-latency capabilities across India and the major APAC markets. Our partnership allows us to offer best in class technology, fully supported on the ground in India, and integrated into our complete trading technology ecosystem.”
